

# Windows Server release information

Article • 12/23/2021

Beginning in September 2023, Windows Server has two primary release channels available: the Long-Term Servicing Channel (LTSC) and the Annual Channel (AC). The Long-Term Servicing Channel provides a longer-term option focusing on stability, whereas the Annual Channel provides more frequent releases. The [Windows Server Semi-Annual Channel \(SAC\)](#) was retired on August 9, 2022.

With the Long-Term Servicing Channel, a new major version of Windows Server is typically released every 2-3 years. The more frequent releases of the AC enable customers to take advantage of innovation more quickly, with a focus on containers and microservices. For a detailed comparison, see [Windows Server servicing channels](#).

The focus on virtualization, container, and microservice innovation continues with [Azure Stack HCI](#), [Windows containers](#), and [AKS on Azure Stack HCI](#).
